

INDUSTRIAL DOSING SKID

Air driven pump skid

Construction

Our industrial dosing skids can be easily installed at the customer site and are ready for use. These dosing skids are obtainable in various types. They are CE-certified and can be equipped with ATEX-proof pumps and instrumentation and therefore applicable in explosion-hazardous areas. Our dosing skids has proven their liability in the chemical en petrochemical industries.

Specifications standard skid

Dosing plunger pump CheckPoint 1250
 Air supply 1.4 – 13.8 Bar ATEX
 Bund SS 304 – 2500x1500x500mm
 Pipe material SS 316L

A variety of valves and gauges are included in the design, including fire safe stainless steel valves, pressure relief valves, pulsation dampers, Y type strainers, and pressure gauges.

On customer request we can supply any brand of pump and instrumentation.

Non-Destructive Testing (NDT) includes Leak Test, Hydraulic Pressure Test, and Proof Load Test. Products can be finished with several techniques including glass blasting.

TYPE	Injection line	Spare pump
Skid 1.0	1	-
Skid 2.0	2	-
Skid 3.0	3	-
Skid 4.0	4	-
Skid 1.1	1	1
Skid 2.1	2	1
Skid 3.1	3	1
Skid 2.2	2	2
